

Vacuum cleaners

September 2014

Welcome to Miele

IMMER BESSER (forever better) – our pledge

When our two great grandfathers founded the Miele company, they had to make sure they stood apart from the competition in order to be successful. There are effectively only two ways of doing this: either by being cheaper than the rest or by being better than the rest. It is not really possible to be both at the same time.

They decided to be "better" than the rest.

Numerous best in class awards and certificates attest to the fact that Miele has continued to renew its commitment to being "Immer Besser" throughout the past 115 years. However, the millions of satisfied customers around the world are perhaps the most important endorsement.

At the heart of this success lies a continuity of values and goals which are typically only found in companies which have been family-run for generations, rather than in businesses which are guided by the often short-term interests of the stock market.

It is in this sense that Miele has embodied first-class product quality and German engineering since 1899. Miele also stands in equal measure for respect, fairness and mutual esteem towards sales partners, customers, suppliers, employees and neighbours. Buying a Miele is an environmentally friendly decision. We ensure this by using methods of production that save resources as well as by producing products which set new standards in terms of their consumption of electricity, water and detergent - and save you money at the same time.*

As directors and co-proprietors of the fourth generation of our business we promise you that this will not change.

Dr. Markus Miele

Dr. Reinhard Zinkann

* Please visit www.miele-sustainability.com for more information on our efforts and guiding principles.

IMMER BESSER

Our brand promise

There are many good reasons for choosing Miele.

Here are just six of them.

Since the company was founded in 1899, Miele has remained true to its "Immer Besser" brand promise. This means: we will do all that we can to be "forever better" than our competitors and "forever better" than we already are. For our customers this means the peace of mind of knowing that choosing Miele is a good decision - and probably the decision of a lifetime.

The Miele brand

In many countries Miele is the most desired brand in its field. In its German home market, Miele was even voted "best brand ever" in 2013 across all product branches. And the ownership of products from such a brand reveals much about its users: Miele customers have high expectations for the performance, convenience, design and environmental friendliness of their domestic appliances. People who buy Miele are quality conscious and have style!

Miele quality

For more than 100 years it has been a proven adage that you can trust Miele and rely on our appliances. We are the only manufacturer in our branch of industry to test products such as our washing machines, tumble dryers, dishwashers and ovens to the equivalent of 20 years of use. Once a Miele, always a Miele: Miele customers around the world remain loyal to Miele and recommend Miele to others. Looking to the future, we promise not to entertain any compromises when it comes to quality and durability!

Miele technology

Miele stands for excellent results combined with the lowest possible energy consumption. This goes for the hygienic and gentle care of your laundry, your flooring and your crockery as well as when conjuring up exquisite culinary delights. The key to this is a wealth of innovative features available only from Miele. This is borne out by numerous first places in leading product tests conducted around the world.

Miele convenience

Whether conventional rotary switch, discreet sensor controls or a high-resolution touch display like the one on your smart phone: operating a Miele is both easy and fun. Add to this a multitude of convenient and reliable automatic programmes and a great love of detail - success is guaranteed - on board both laundry and kitchen appliances. Make life easier for yourself with Miele!

Miele design

Miele believes in clean lines and timeless elegance. Nowhere else will you find such a comparable range of built-in kitchen appliances, with consistency in Design lines and colour options, to suit the most diverse of interior designs and kitchen furniture fronts. Great care is taken to coordinate appliance design across the range. Whatever the style of your kitchen: Miele is the perfect match.

Miele Service

Miele customers enjoy preferential treatment: thanks to our fast and efficient after-sales service operation which has been voted best in its branch of industry many times over. Even if you need personalised instructions on appliance use or professional cleaning of your appliances, Miele will gladly make a home visit. We will always be there for you. That's a promise!

The new EU energy label for vacuum cleaners

Why have an EU energy label?

An energy label is being introduced in line with EU rulings for vacuum cleaners in order to reduce European energy consumption and to make the performance of appliances more transparent for the customer. It will also contribute towards environmental protection.

When will the new energy label be introduced?

From 1 September 2014 all vacuum cleaners throughout Europe will have an energy label. The maximum power consumption for vacuum cleaners will be limited to less than 1600 Watts in accordance with the Eco Design Directive.

The following information will be shown on the new energy label:

Name or trade mark of the supplier

Model number

Energy efficiency class

The energy efficiency class indicates how much power each vacuum cleaner uses and hence its electricity consumption. Factors taken into account include the lifespan of the appliance, environmentally-friendly manufacturing processes and how easily recyclable the product is.

Dust re-emission class

The dust re-emission class states how clean the exhaust air of the vacuum cleaner is.

Carpet cleaning performance class

The carpet cleaning performance class is determined by rolling dust into a carpet and then vacuuming it up. The more dust that is vacuumed up the higher the cleaning performance of the vacuum cleaner.

Hard floor cleaning performance class

The hard floor cleaning performance class is determined by sprinkling dust on a cracked wooden board then vacuuming it. The more dust that is vacuumed up the higher the cleaning performance of the vacuum cleaner.

Average annual energy consumption

The average annual energy consumption is stated in kilowatt hours per year (kWh/annum). It is calculated based on an average household with 87 square metres of living space that is vacuumed 50 times per year. The actual consumption depends on the frequency of use of the vacuum cleaner.

Sound power level

The sound power level indicates the sound level of the appliance in decibels. This value is measured on carpet.

High suction power. Low consumption.

The different Miele motors

How can a vacuum cleaner be powerful whilst using so little energy? Miele has found several answers to this question and are proud to introduce a new generation of vacuum cleaners with a number of technological refinements which ensure unbeatable efficiency.

This new generation of Miele vacuum cleaners uses up to 50% less electricity than appliances that were on the market just a few years ago. At the same time, they ensure superb cleaning performance.

Miele offers two types of motor for your floor care requirements: EcoLine and PowerLine. Regardless of which one you choose: each model offers you the ideal balance of performance and consumption.

Highly efficient thanks to Smart Power technology: EcoLine Plus*

A masterpiece of efficiency:

Miele's EcoLine Plus models with unique Smart Power technology offer several innovative performance-enhancing features including an efficient AirTeQ floorhead. The EcoLine Plus motor benefits from additional PowerBlades for improved fan performance as well as an intelligent PowerChip. While vacuuming the chip continually adjusts power consumption to suit the situation perfectly. This enables the appliance to always achieve the best possible cleaning results with a maximum power consumption of just 800 Watts and attain the highest rating of A for energy efficiency on the energy label. First-class efficiency by Miele.

Energy-saving thanks to an efficient motor: EcoLine

EcoLine vacuum cleaners use a maximum of 800 Watts making them very energy-efficient and achieve energy efficiency class B on the energy label.

For perfect cleaning performance: PowerLine

With a peak power of 1600 Watts, PowerLine models have particularly powerful suction. Designed for thorough cleaning without compromise, Miele PowerLine vacuum cleaners offer excellent cleaning performance.

* Features vary depending on model

The perfect solution for every home

Different types of Miele vacuum cleaners

Models

Cylinder vacuum cleaners

A cylinder vacuum cleaner has the classic shape of a sledge and follows you easily through the room thanks to its smooth-running castor wheels. This allows you to comfortably vacuum large areas.

Upright vacuum cleaners

Miele's Dynamic U1 upright vacuum cleaner is the specialist for hard-wearing carpets with a lot of traffic. Upright vacuum cleaners glide along in front of you and are ideal for large areas of carpet.

Robot vacuum cleaner

Miele's battery-operated robot vacuum cleaner works completely on its own, even when no one is at home. Thanks to Smart Navigation it works thoroughly and efficiently around the house.

The perfect model for all your flooring

Miele cylinder vacuum cleaners

What makes Miele vacuum cleaners so unique?

The core characteristics of all Miele vacuum cleaners

Miele vacuum cleaners offer an ideal combination of superior cleaning performance, excellent ease of use, outstanding standards of hygiene, and first-class quality.

Cleaning performance:

Very effective: the unique design allows you to achieve optimum results even with low power.

Easy to use:
Miele has developed some clever technical features to make vacuum cleaning easier for you.

Hygiene:
You can breathe easily with Miele's multi-stage filtration system which ensures clean air while vacuuming.

Quality:
Exacting quality checks during manufacture guarantee high standards of quality and a long lifespan.

Cleanliness for your well-being

Miele vacuum cleaner hygiene*

Choosing the right dustbag

It is often difficult to find the right dustbag for a vacuum cleaner. With Miele Original 3D HyClean dustbags it's easy: simply match the colour of the collar on the dustbag to the colour of the holder inside your vacuum cleaner.

First class suction power

Thanks to several layers of filtration and a special SoftStructure surface, the Miele HyClean dustbag lets air pass through it even as it fills up. The appliance will indicate when the dustbag is full or the exhaust filter is saturated. After replacing the dustbag and the filter, you can enjoy the same level of suction power, cleaning performance and hygiene, as you did when you first used your vacuum cleaner.

20% more capacity in the bag

Thanks to innovative 3D technology Miele's new Original 3D HyClean dustbags exploit the volume of the bag fully and last up to 20% longer than the previous HyClean dustbags. Retaining a particularly large amount of fine dust, dust diffusers distribute the vacuumed dust evenly within the dustbag so that the full capacity is used.

Dust-free hygienic dustbag replacement

When the vacuum cleaner is opened, the Original Miele 3 D HyClean dustbag's collar closes automatically and locks in the vacuumed dust for good. Furthermore, the secure Protector Netting prevents the bag from tearing, even when sharp objects such as glass fragments are vacuumed up. So fine dust which has been vacuumed up cannot escape again.

* Features vary depending on model

Miele stays airtight

For people with house dust allergies, we recommend a vacuum cleaner with a HEPA filter fitted as standard. TÜV Nord (environmental testing board) has also recommended several Miele cylinder vacuum cleaners with HEPA AirClean filters for people with allergies. With a specially sealed casing the entire appliance, not just the exhaust filter, meets the requirements of the TÜV Nord, which are reviewed annually. **The filtered and discharged air is cleaner than normal room air.** In addition, bacteria, allergens and mould spores remain safely in the dustbag.

Exhaust filters:

With Miele, you have a choice of three:

AirClean filter:

Effective filtration for everyday needs.
>99.9% dust retention capacity¹⁾ in combination with the HyClean dustbag and motor filter.

Active AirClean filter:

Significant reduction of unpleasant odours²⁾ – ideal for pet owners.

HEPA 13 AirClean filter:

Models with a HEPA AirClean filter 13³⁾ effectively capture pollen, dust mites, fine particles and allergens and achieve up to > 99.999% overall dust retention¹⁾ making them the ideal for allergy sufferers.

¹⁾ In accordance with EN 60312-1

²⁾ In accordance with DIN EN 13725

³⁾ In accordance with EN 1822/2011

Exclusive features for perfect cleaning results and ease of use

Product highlights* of Miele cylinder vacuum cleaners

Exclusive to Miele **The Miele Comfort handle**

With lever action: The floorhead can be easily manoeuvred thanks to the flexible hose connector.

Silence System

Nice and quiet: Miele's Silence System with noise-optimised motor and integrated sound insulation.

Exclusive to Miele Comfort cable rewind with single-touch control

Quick and easy: the entire cable can be rewound by simply tapping the footswitch.

Exclusive to Miele Compact System

A real space saver: the floorhead and suction tube can be parked on either side of the vacuum cleaner.

Exclusive to Miele DynamicDrive swivel castors¹⁾

Protect your floors: rubberised wheels and swivel castors with shock absorbers ensure a quiet driving experience.

A complete range of accessories

Integrated or on the VarioClip: cylinder vacuum cleaners are supplied with an upholstery nozzle, a crevice nozzle and a dusting brush. Other attachments and floorheads are available to order.

* Features vary depending on model

1) Patents pending: EP 2409627, US 20120017391

Exclusive features for perfect cleaning results and ease of use

Product highlights* of Miele upright vacuum cleaners

Exclusive to Miele Automatic height adjustment¹⁾

Particularly thorough: the electrobrush automatically adjusts to the carpet pile.

Large operating radius

You barely need to change sockets: Miele upright vacuum cleaners provide an operating radius of up to 14 metres.

Slimline design

The slim body makes it possible: to vacuum under beds, tables and sideboards with ease.

Large HyClean dustbag

Saves time and money: the dustbag has a volume of 6 litres thus eliminating the need to replace the dustbag constantly.

A complete range of accessories

Integrated: Miele's upright vacuum cleaners are equipped with an upholstery nozzle, a crevice nozzle and a dusting brush.

* Features vary depending on model

¹⁾US 8166608. Patent pending: DE 102007040948, EP 2033560

²⁾US 8186007. Patent pending: DE 102007040949, EP 2030544

Extra powerful for large areas of carpet

Carpeted floors deserve the very best care they can get which is why Miele has developed the Dynamic U1. These vacuum cleaners have an integrated roller brush which cleans carpet fibres thoroughly whilst carefully restoring the pile.

ComfortTwister²

Exclusive
to Miele

Highly manoeuvrable: the double-swivel joint on the Dynamic U1 makes it particularly agile and versatile.

Exclusive features for perfect cleaning results and ease of use

Product highlights of the Miele Robot vacuum cleaner Scout RX1

Furniture Protection Technology

Accident free: The Scout RX1 has sensors which recognise obstacles such as furniture and steps to prevent collisions and tumbles.

Advanced Corner Cleaning

The Scout RX1 reliably finds every corner to remove dust and dirt.

Triple Cleaning System

Sweeps, brushes and vacuums: thanks to the triple cleaning system the Scout RX1 removes dust and dirt thoroughly.

Non-Stop Power

Operates for longer: the rechargeable battery in the Scout RX1 lasts for up to 120 minutes (150 m²) without needing to be recharged. And lasts up to 3 times longer than other batteries.

Timer

Vacuum automatically: you can decide when you want the Scout RX1 to vacuum your floors - even when there's no one at home.

Smart Navigation

An indoor positioning system enables precise orientation around the room including difficult-to-access areas.

Original Miele vacuum cleaner accessories

For perfect and convenient dust pick-up

Perfect dust pick-up

Because all homes are furnished differently and people have different needs, Miele offer a wide range of vacuum cleaner accessories. These enable you to adapt your Miele vacuum cleaner to suit your personal requirements. For example, you can use floorheads and brushes which suit your type of floor and use special accessories for different surfaces. Difficult-to-access areas can also be accessed quickly without having to bend or climb.

Miele seals the dust safely in the dustbag

The Miele Air Clean filtration system, consisting of the Miele vacuum cleaner together with the dustbag, the motor protection filter and the exhaust filter, guarantees a high level of hygiene. Using original Miele accessories with Miele vacuum cleaners reduces the fine dust particle count in room air significantly. The interplay of all components guarantees a filtration level of more than 99.9% ¹⁾ of fine dust. And because dust is reliably vacuumed up and not dispersed back into the room the air expelled back into the room will be even cleaner than it was before you started!

Quality and safety

Miele accessories must withstand the highest degree of strain and endurance testing. Just like our vacuum cleaners, they are tested for the equivalent of 20 years' use²⁾.

Gentle cleaning

By using genuine original Miele accessories, your floors, furniture and other surfaces will be cleaned gently and carefully, yet extremely thoroughly.

¹⁾ In accordance with EN 60312-1

²⁾ Equating to an average use of 45 minutes per week at maximum power

Miele Scout RX1 robot vacuum cleaner accessories

For perfect and convenient dust pick-up

For reliable dust pick-up

Maintain the cleaning performance of your Scout RX1 with original Miele accessories. Regularly changing filters and brushes ensures continuous suction and cleaning performance of your robot vacuum cleaner as well as reliable dust lock-in. Changing accessories on your vacuum cleaner is very simple and your robot vacuum cleaner can be used again in next to no time.

Magnetic strip

To protect certain areas or items, the magnetic strips are used to define the appliance's working area. These can be carpets, rooms or items you do not want the Scout RX1 to clean or to pick up.

Magnetic strip RX-MB 4

To define areas where the vacuum cleaner is allowed to clean

- Temporarily or permanently
- For example for protecting certain areas or rugs
- Contents: 4 x 1 metre magnetic strips, adhesive

Mat. no. 9782660

4 AirClean filters RX-SAC 1

For reliably capturing dust and for clean room air

- Filtration of dust particles from vacuumed air
- Motor protection for maintaining cleaning performance
- Contents: 4 filters

Mat. no. 9724050

Side brushes RX-SB 2

For thorough cleaning of edges and corners

- With high-quality, robust bristles made from synthetic fibres
- Suitable for hard flooring and short pile carpets
- Contents: 2 brushes (left and right)

Mat. no. 9724010

Sealing lip RX-DL 1

For effective and reliable dust pick-up

- Simple and easy to fit
- Suitable for hard flooring and short pile carpets
- Contents: 1 sealing lip

Mat. no. 9782730

Roller brush RX-BW 1

Rotates to remove even stubborn soiling

- With high-quality, robust bristles made from synthetic fibres
- Suitable for hard flooring and short pile carpets
- Contents: 1 roller brush with bearing and cleaning tool

Mat. no. 9782630

Vacuum cleaner accessories

Universal floorheads for carpets and hard floors

You want your floors to be cleaned thoroughly and gently, but at the same time quickly and easily. This is easy as long as you select the right floorheads and floorbrushes for your floors.

Flexible all-rounders: Miele universal floorheads

Miele's universal floorheads are ideally suited to homes with different types of floor coverings. Foot switches for operating the all-round bristle strip are located on the floorhead and it is easy to engage or retract it depending on the type of flooring you are vacuuming. This makes Miele universal floorheads suitable for cleaning carpets as well as hard floors. Thanks to the metal soleplate and rubberised rollers, they glide gently across the floor. For homes with large rooms with wall-to-wall carpets or hard flooring Miele offer a range of floorheads for short-pile and long-pile carpet as well as floorbrushes specifically developed for parquet, laminate and hard flooring.

Allergotec floorhead: for hygienic cleanliness

This multi-purpose floorhead with Allergotec hygiene sensor uses 3 colours to indicate the cleaning progress. When the indicator turns green, the floor is hygienically clean. This floorhead offers peace of mind for allergy sufferers and families with small children!

The three-stage colour code indicates the cleaning progress:

- Red: regular levels of soiling
- Amber: low levels of soiling
- Green: hygienically clean, or in other words, virtually free from pollen and dustmite faeces

Recommended for allergy sufferers and families with small children.

Exclusive
to Miele

Allergotec floorhead SBDH 285-3

With three-stage colour indicator and a hygiene sensor.

- Practical traffic light signals indicate cleaning progress
- Extendable and retractable bristles for vacuuming carpet and hard floors
- Wide suction aperture for good cleaning along walls and edges
- Wide thread catcher on underside for removing hair
- Metal soleplate for effortless gliding over carpets

Mat. no. 7250010

Exclusive
to Miele

Universal floorhead AirTeQ SBD 650-3

The energy-saving universal floorhead for particularly quiet vacuuming

- Perfect cleaning results at low wattage thanks to optimised air stream
- For particularly quiet and efficient vacuuming
- Up to 40% less energy consumption thanks to optimised air stream
- Large, rubberised rollers for running smoothly over hard floors
- Metal soleplate for easy, gentle gliding over carpets
- With soft furniture protection strip

Mat. no. 7879500

Universal floorhead AllTeQ SBD 285-3

Universal floorhead for extremely effortless vacuuming, particularly of carpets

- Extendable and retractable bristles for vacuuming carpet and hard floors
- Double swivel joint and full size metal soleplate for smooth and easy gliding over carpets
- Wide suction aperture for good cleaning along walls and edges
- Large, rubberised rollers prevent scratches on hard floors
- Wide thread catcher on underside also removes hair

Mat. no. 7253830

Universal floorhead SBD 350-3

Universal floorhead for effortless gliding, particularly over carpets

- Wide metal soleplate for gliding gently across carpets
- Extendable and retractable bristles for vacuuming carpet and hard floors
- Large, rubberised rollers for running smoothly over hard floors
- For gentle and convenient vacuuming of all types of floors

Mat. no. 7096793

Vacuum cleaner accessories

Floorbrushes specifically for scratch-sensitive or robust hard floors

Extremely gentle, easy-running and nimble:

Miele parquet floorheads for scratch-sensitive hard floors

Many floors such as parquet, laminate flooring, polished tiles and high-quality tiles are very susceptible to scratches. To ensure these types of floor carry on looking good, Miele have developed a range of parquet floorbrushes to clean them particularly gently and thoroughly. With their soft all-round bristle strip, Miele parquet floorbrushes glide softly and gently over your floors. Parquet Twister floorbrushes are extremely flexible and nimble thanks to a unique double swivel joint!

Exclusive to Miele

**Parquet floorbrush
Parquet Twister XL SBB 400-3**

For quick and gentle cleaning of scratch-sensitive hard floors

- Large areas can be vacuumed in the shortest of times thanks to a 41 cm wide floorhead
- Extremely nimble and flexible thanks to a unique double swivel joint
- Soft natural bristles glide smoothly and easily over floors

Mat. no. 7101160

**Parquet floorbrush
SBB Parquet-3**

For gentle and effortless cleaning of scratch-sensitive hard floors

- Wide suction aperture for thorough cleaning of floors and along edges
- Soft natural bristles glide smoothly and easily over floors
- Two rubberised rollers for running smoothly over hard floors

Mat. no. 7236220

Miele hardfloor floorbrushes

Miele's hardfloor floorbrushes have high-quality, hard-wearing bristles to sweep fine dust out of deep gaps and crevices making them ideal for vacuuming tiled and other structured hard floor surfaces. The Hardfloor Twister has a unique double swivel joint making it easy to use in awkward areas.

**Hardfloor floorbrush
Hardfloor Twister SBB 300-3**

For thorough and effortless cleaning of hard floors.

- Extremely flexible and nimble thanks to its unique double swivel joint
- It easily accesses difficult to reach gaps
- High quality synthetic bristles get dust out of deep gaps

Mat. no. 9730770

**Hardfloor floorbrush
Hardfloor SBB 235-3**

For thorough cleaning of robust hard floors

- With high-quality, robust bristles made from synthetic fibres
- Wide suction aperture for thorough cleaning of floors and along edges
- Two rubberised rollers for running smoothly over hard floors

Mat. no. 7239160

Vacuum cleaner accessories

Turbobrushes specifically for short-pile, textile floor coverings and surfaces

For thoroughly cleaned and beautiful carpets: Miele Turbobrushes

Carpets should be vacuumed regularly, even when there is no visible dirt. To ensure that dust, hair or threads which have settled deep into the carpet are removed reliably, carpets must be brushed at the same time as they are vacuumed. The roller brush in Miele's Turbobrush is powered by the passage of air through the suction tube to ensure the thorough removal of dirt.

Vacuuming on a regular basis restores the pile and improves its appearance.

Turbobrushes can be used with almost any Miele cylinder vacuum cleaner.

Ideal for pet owners and households with short-pile carpets.

Large turbobrush STB 205-3

For rapid removal of hair and threads from carpets

- No separate power supply required: directly powered by the air stream
- Carpet threads are not pulled out
- Air adjustment slide prevents rugs being sucked into the vacuum cleaner

Mat. no. 7250040

Turbobrush STB 201

For rapid removal of hair and threads from carpets

- No separate power supply required: directly powered by the air stream
- Carpet threads are not pulled out
- Suitable for use with non-Miele vacuum cleaners with a suction tube diameter of 30 - 38 mm

Mat. no. 4813530

Vacuum cleaner accessories

Electrobrushes specifically for deep-seated soiling in hard-wearing carpets

For thoroughly cleaned and beautiful carpets: Miele Electrobrushes

Carpets subjected to heavy use can be particularly difficult to clean if dust, fluff, threads and hair are trodden deep into the pile. For your high-quality carpets to remain in good condition and be cleaned thoroughly and deeply, they must be brushed at the same time as they are vacuumed. The long bristles of the electrically powered Miele Electrobrushes penetrate deep into the pile of your carpets and effectively and reliably remove soiling. Your carpets are not only cleaned thoroughly, the pile is also actively refreshed, ensuring that your carpet keeps its good looks for longer.

Electrobrushes are connected to the vacuum cleaner either directly or by clip cable. Your Miele dealer will be happy to advise you on which one is suitable for your vacuum cleaner.

For appliances with an electro suction hose

Electrobrush SEB 236 Electro Premium

- Particularly wide for rapid and deep cleaning
- An electrically driven roller brush removes persistent soiling
- Five-stage height adjustment for different depths of pile
- Motor for powerful cleaning of all depths of pile
- Integrated lighting for illuminating the working area
- Suitable for use with vacuum cleaners that have an electro suction hose

Mat. no. 7243060

For appliances with socket

Electrobrush SEB 216-3 Electro Comfort

- With roller brush for intensive cleaning of robust carpets
- An electrically driven roller brush removes persistent soiling
- Motor for powerful cleaning of all depths of pile
- With clip cable for easy retrofitting on all Miele cylinder vacuum cleaners with suitable socket

Mat. no. 7250750

Vacuum cleaner accessories

For difficult-to-access areas and delicate surfaces

Mini turbobrush STB 101

For rapid removal of hair and threads from carpeted stairs, car floors etc.

- No separate power supply required: directly powered by the air stream
- 16 cm wide suction aperture
- Air adjustment slide prevents rugs being sucked into the vacuum cleaner
- Can be attached to the handle or suction tube

Mat. no. 7252850

Dusting brush with flexible swivel joint SSP 10

For gentle cleaning of high-quality surfaces thanks to natural bristles

- With adjustable swivel joint
- A soft bumper strip protects furniture from scratching
- Fits directly onto the handle on all Miele cylinder vacuum cleaners

Mat. no. 7132710

Flexible crevice nozzle, 56 cm long SFD 20

For cleaning difficult-to-access areas thanks to its extra length and flexibility

- Ideal for otherwise difficult-to-access areas
- Flexible central section for reaching around obstacles
- Fits directly onto the handle of all Miele cylinder vacuum cleaners

Mat.no. 7252100

Compact Mini turbobrush STB 20

For rapid removal of hair and threads from confined spaces

- With swivel joint for accessing awkward areas
- Reinforced edge to remove persistent soiling
- Ergonomically optimised for left- and right-handed users
- Quick and easy to clean thanks to an access panel on the back
- Can be attached to the handle or suction tube

Mat. no. 7805350

Long crevice nozzle, 30 cm long SFD 10

For cleaning deep gaps

- Ideal for long, narrow crevices and gaps
- Fits directly onto the handle of all Miele cylinder vacuum cleaners
- Suitable for cleaning fluff filters in tumble dryers

Mat. no. 7250050

Flexible hose extension SFS 10

Gives an additional 1.5 m operating radius when vacuuming

- Extendable hose for extra reach
- Practical storage in hose sleeve after vacuuming
- Fits between handle and suction tube
- (not suitable for vacuum cleaners with an electro-suction tube)

Mat. no. 7252210

**Radiator brush
SHB 20**

Perfect for cleaning difficult-to-access gaps, blinds and radiators

- With strong and robust synthetic bristles

Mat. no. 9223430

**Mattress nozzle
SMD 10**

For vacuuming gaps between bed frame and mattress, and between sofa cushions.

- Thread catcher on underside for removing hair
- Slim design for narrow gaps
- Fits directly onto all Miele cylinder vacuum cleaner handles

Mat. no. 7252280

**Wide upholstery nozzle
SPD 10**

For easy, quick and thorough cleaning of upholstery

- Adjustable nozzle for more flexibility
- Wide thread catcher on underside for removing hair
- Fits directly onto all Miele cylinder vacuum cleaner handles

Mat. no. 7252190

Hygiene seal SHV10

The hygiene seal contains active charcoal pellets and is designed to keep odours inside the bag when the suction hose has been removed for storage.

Mat. no. 6622030

**Universal brush
SUB 20**

For rapid cleaning of delicate surfaces thanks to natural bristles

- Flexible swivel joint for extra versatility
- A soft bumper strip prevents scratches to furniture
- Thicker-set natural bristles for gentle cleaning
- Can be attached to the handle, suction tube or suction hose

Mat. no. 7475870

**Comfort handle with SpotLight
SGC 20**

For illuminating areas requiring cleaning

Ergonomically designed for easy handling

- At a single touch of a button: LED for bright illumination of dark corners
- Easily retrofittable and versatile
- (not suitable for vacuum cleaners with an electro-suction tube)

Mat. no. 9385930

Original Miele exhaust filters

To safely lock the vacuumed dust inside the bag

The innovative Miele AirClean filter system consists of an original Miele dustbag, a motor protection filter and an original Miele exhaust filter. These three filtration stages ensure that vacuumed dust remains securely locked in. The room air is cleaner than before vacuuming and it takes longer for dust to settle on furniture and surfaces again.

Miele offer three different types of exhaust filters:

AirClean filter

Effective filtration for everyday requirements.
More than 99.9% dust retention capacity¹⁾ with HyClean dustbag and motor protection filter.

Active AirClean filter

Significant reduction of unpleasant odours²⁾ – ideal for pet owners.

HEPA AirClean filters

Filters out even finest dust and allergens – ideal for those allergic to house dust.
> 99.999% dust retention capacity¹⁾, as well as HEPA 13 classification³⁾.

Our recommendation for allergy sufferers:

Anyone who is allergic to domestic dust should use vacuum cleaners with a HEPA filter fitted as standard and a special airtight casing seal. These appliances ensure that **the filtered air discharged from the vacuum cleaner is cleaner than ambient room air before vacuuming**. As a result of these features, some Miele vacuum cleaners are explicitly recommended for allergy sufferers by TÜV North, a German material testing institute. To ensure that excellent filtration values are maintained over the entire product life, the HEPA filter must be exchanged when it is saturated - approx. once a year.

1) in accordance with EN 60312-1

2) in accordance with DIN EN 13725

3) in accordance with EN 1822/2011

Original Miele exhaust filters

Miele's new timestrip® filter change indicator, attached directly to the filter, is activated by pressing firmly down on the arrow after inserting it into the vacuum cleaner. When the entire length of the indicator has turned red, the filter is saturated and has to be exchanged. The timestrip® helps you to monitor the perfect functioning of the filter. By doing so you can be sure that the dust is safely locked in, and that the room air is clean.

HEPA 13 AirClean filter, with timestrip SF-HA 30

For all S2, S300-800, S7 and Complete C1, Classic C1, Dynamic U1 models

Mat. no. 9616270

HEPA 13 AirClean filter, with timestrip SF-HA 50

For all S4, S5, S6, S8 and Compact C1-C2, Complete C2-C3 models

Mat. no. 9616280

Active AirClean filter, with timestrip SF-AA 30

For all S2, S300-800, S7 and Complete C1, Classic C1, Dynamic U1 models

For all S2, S300-S800, S4, S5, S6, S7, S8 and Complete C1-C3, Compact C1-C2, Classic C1, Dynamic U1 models

Mat. no 3944711

Original Miele dustbags

Securely locked in dust - extended life cycle

Reasons why you should only use original Miele vacuum cleaner dustbags

New standards are set in floorcare with the new generation of original Miele HyClean 3D Efficiency vacuum cleaner dustbags.

The advantages of the new Miele vacuum cleaner dustbags:

Thanks to several layers of filtration and a special SoftStructure surface, Miele's AirClean system offers maximum dust retention capacity which guarantees that dust is locked securely inside the bag.

The new dustbags also offer the highest level of efficiency when vacuuming at a low power level. This allows you to save energy when vacuuming without compromising the high cleaning performance you are used to.

The life cycle of a dustbag increases by up to 20% compared to Miele's previous HyClean dustbags. The innovative 3D technology distributes dust optimally in the dustbag and exploits the bag volume fully.

Another reason why you should opt for Miele original products. Only Miele dustbags together with Miele vacuum cleaners form a perfect lock-and-key principle which results in vacuumed dust being directed securely into the dustbag.

Box of dustbags HyClean 3D efficiency FJM

HyClean 3D efficiency FJM dustbags

- Filters out more than 99.9% of all fine dust particles
- Highly efficient, even when vacuuming using a low power setting
- Longer use thanks to 3D technology of dustbag
- Clean and easy replacing of dustbag thanks to automatic dustbag seal and colour coded collar
- Contents: 4 dustbags, 1 motor protection filter, 1 exhaust filter

For all S 700, S4, S6, Complete C1, Compact C1-C2 models.

Mat. no. 9917710

Box of dustbags HyClean 3D efficiency GN

HyClean 3D efficiency GN dustbags

- Filters out more than 99.9% of all fine dust particles
- Highly efficient, even when vacuuming using a low power setting
- Longer use thanks to 3D technology of dustbag
- Clean and easy replacing of dustbag thanks to automatic dustbag seal and colour coded collar
- Contents: 4 dustbags, 1 motor protection filter, 1 exhaust filter

For all S2, S5, S8, Complete C2-C3 and Classic C1 models

Mat. no. 9917730

Box of dustbags HyClean U

HyClean U dustbags

- Filters out more than 99.9% of all fine dust particles
- Tear resistant thanks to an impact-proof liner preventing damage even in the event of sharp items entering the bag
- Clean and easy replacing of dustbag thanks to automatic dustbag seal and colour coded collar
- Contents: 4 dustbags, 1 motor protection filter, 1 exhaust filter

For all Dynamic U1 models.
