

Miele Professional

Laundry and dishwashing solutions for hotels.

A range of high quality and reliable dishwashers and laundry machines for hotels of all sizes.

Miele
PROFESSIONAL

Introduction

Whether you're a large hotel, or a boutique guesthouse, the need to continuously clean sheets and towels, glasses and crockery remains the same. All hotels need to maintain a high level of quality everyday, and in order to achieve this, laundry and dishwashing equipment requires the same key features; speed, performance and reliability.

Miele Professional offer a full line-up of machines for laundry care and dishwashing in hotels. Users benefit from comprehensive solutions which include planning, installation and after-sales service.

From boutique bed and breakfasts to large hotels and spas, having a reliable, fast and cost-effective on-premise solution makes a huge difference to the quality of service to your customers

Miele Professional laundry machines and commercial dishwashers offer clients the greatest possible benefits in terms of economic operation and dependability. All specifications and features address the real needs in commercial laundry care and dishwashing.

We pride ourselves on high-level customer satisfaction. Long term ownership is a feature of every Miele machine and the associated cost and environmental benefits of reliable and long lasting machines are appreciated by our customers. In a recent survey, 97% of customers stated that they would buy their machines again from Miele Professional.

“

The machines have made our lives so much easier. They are top of the range, but the high standards and efficiency of the products means that in the long run their quality and reliability means excellent value for money. We are so delighted with our washing machine and dishwasher. We would recommend Miele Professional to anyone in our line of business.

Towel laundry

Our range of washer-extractors and tumble dryers offer excellent performance in a compact and stackable package.

Perfect for smaller hotels or spas, our 5.5 - 8kg machines take up less space than you might think; with a footprint of less than 1m² when stacked they are perfect for use where space is a premium.

The Little Giant range has a load capacity of up to 6.5kg and short wash cycles to ensure they keep up with demand whilst still producing exceptional results. A full load of laundry can be processed in as little as 90 minutes. Our 8kg capacity machines can wash up to 200 towels per day.*

All of the range features our patented honeycomb drum which cushions laundry, preserving the quality, softness and life of your towels.

Key features:

- 5.5 - 8kg capacity
- High temperature disinfection programs (up to 93°C)
- Designed, tested, and built to last up to 30,000 wash cycles
- Condenser & heat pump dryers dryer offers full installation flexibility
- Dryer featuring residual moisture sensor
- Drain pump or dump valve options
- Stackable design
- 24 hour delay start
- WRAS approved – Category 5

Ideal for:

 ideal for all size hotels where space is a premium.

 Spas & health clubs

On-premise laundry

The flexibility, responsiveness and ease of having an on-premise laundry gives hotels complete control over their laundry costs and quality.

For hotels that have the space for a laundry operation in house, a Miele Professional on premise laundry can offer the best solution.

Greater independence, cost savings, speed and clean laundry available at all times are key benefits to hotel owners. Guests benefit from perfectly laundered bed linen and towels that have a beautiful feel and bounce.

Key benefits of an on-premise laundry:

- Superb quality
- Independence from 3rd party service providers
- Responsiveness to peak periods
- High quality control
- High availability of laundry
- Fast turnaround times
- Sustainable, energy efficient process
- Increased longevity of linen and textiles

Ideal for:

 Medium to large hotels

 Spas & health resorts

Having an onsite commercial laundry at Candacraig is revolutionary to us, we are able to do everything required to run a luxury business here.

Lynne Lino

Owner of Candacraig House
Aberdeenshire

Case study: Candacraig House

Candacraig is an exclusive luxury retreat in the Cairngorms National Park in Aberdeenshire. Previously, all of their laundry was outsourced, which was a time consuming and expensive process, and they were noticing the quality of their laundry deteriorating. 'We try to offer a 5 star service. I wanted something in-house that we could turn around the very next day' Making the decision to bring their laundry in house, but having only a small floor space, they opted for two stacked 8Kg washer and dryers and a rotary ironer. 'The space that the laundry is having to take up is really minimal, that was one of the big surprises'

Warewashing

A complete dishwashing system designed to save time and increase throughput, without compromising on a high quality wash.

From boutique hotels through to large hotel chains, the priorities of a dishwasher are different. Whether you need the ability to wash up to 3234 glasses per hour or value the ability to use glasses straight from the dishwasher without polishing, we've a dishwasher to suit.

We've got two distinct dishwasher ranges; tank and freshwater.

Our new range of tank dishwashers are ideal for larger establishments that require a fast turnaround of glasses and crockery without compromising on the quality of the clean. With a fastest wash cycle of just 45 seconds - on our BrilliantCompact model - even the busiest of periods can be managed with ease.

Our freshwater dishwashers offer wash cycles of just 5 minutes with two intakes of freshwater in each wash, ensuring a perfectly clean and hygienic wash every time. With our simple-to-use controls, 13 programmes and configurable baskets, our dishwashers will impress from day one.

The Tank range:

-  **BRILLIANTcompact**
-  **UNIVERSALcompact**
-  **UNIVERSAL**
-  **PERFORMANCE**

The Freshwater range:

-  **SPEED**
-  **SPEEDplus**
-  **BRILLIANT**

A comprehensive range of high quality and reliable freshwater and tank dishwashers **designed for speed and quality, perfect for a busy hotel kitchen**

High quality means low impact

Producing machines that lead the way in energy and water efficiency not only helps to reduce running costs for the owner, it also reduces the impact on our environment. At the heart of all our product design is sustainable, cost-effective performance that achieves optimum results.

We also build our machines to last. This means you will replace them less often, minimising environmental impact and disposal costs as well as enjoying low long-term ownership costs.

When a Miele product does eventually come to the end of its useful life, most of it is easily recyclable - so from start to finish we are ensuring maximum sustainability.

Miele stands by its responsibility for climate protection. Through consistent improvements in efficiency in production and in buildings, we have been able to achieve a significant reduction in energy consumption.

*Dr Eduard Sailer,
Miele board member
responsible for
technology at Miele*

Our machines offer many characteristics which significantly contribute to sustainability:

low consumption (of energy, water and chemical substances), a high proportion of recyclable materials and secondary raw materials and environmentally friendly procedures.

Investing in Miele not only brings energy savings and superb performance using state-of-the-art technologies, it brings the reassurance of investing in a company that's committed to sustainable and efficient production processes and reducing its environmental impact.

All Miele Professional products are certified to ISO 9001, ISO14001, OHSAS 18001 and SA 8000 standards.

Miele, a family owned company, was awarded the **2014 German Sustainability Prize**

Miele's stated aim is to develop efficient and durable products with the smallest ecological footprint possible, from production to use and disposal.

Sustainable, cost effective performance

Product development

- Compliance with legislation and directives (e.g. EcoDesign requirements for ErPs)
- Integrated product policy
- Consideration of stakeholder requirements
- Selection of material with an aim to use secondary raw materials and achieve a high recyclability and, as a consequence, great resource efficiency

Production

- Environment and energy management
- Use of best available techniques
- Avoidance of critical substances

Transport and logistics

- Short transport routes
- Transport bundling
- Efficient utilisation of freight space
- Use of low-emission transport

Usage phase

- Low consumption levels
- Long product life
- Qualified maintenance and repair service

Disposal

- Legal compliance (WEEE, RoHS)
- Commitment to optimising recycling processes/increasing recycling quota

Miele Professional

Laundry and dishwashing solutions for hotels

Quality

Perfect cleaning performance, a brisk pace and stamina are the attributes attached to a dishwasher which can be seen as a professional chef's best aide. Miele confirms the great trust placed in it by users with a typical combination of high-quality materials, perfect workmanship, mature and sophisticated technology and practical innovations.

Performance

While the professionals in the kitchen rise to the challenges of their task, Miele dishwashers are hard at work producing sparkling results cycle after cycle. No matter whether they are coping with mountains of crockery, glasses, cutlery or pots and pans – in the rough and tumble of everyday work, you can rely on all your tableware and glassware being ready for use again in next to no time.

Efficiency

Economy and ecology are closely related in modern commercial kitchens. The new Miele dishwashers combine economic efficiencies with the careful use of resources in the most exemplary of ways. Fresh water dishwashers excel in terms of high throughput rates, short cycles and low operating costs, making them the most efficient proposition for many commercial kitchens.
