Quality at all levels:
Laundry solutions for your laboratory

Miele Professional. Immer Besser

Our 360° solutions for your laboratory

Introducing our range of textile washers and dryers, specifically designed for the laboratory.

Hygiene and cleanliness is imperative to the effective running of a busy lab. For the efficient cleaning of lab coats and other protective clothing, the new generation of Little Giants washing machines and dryers are designed to excel in every sense.

With the benefits of washing and drying cycle times of only 87 minutes, a convenient stack footprint of less than 1m² and a range of thoughtful, labour-reducing features, the Little Giants are a perfect fit to help you make your lab life easier.

Bringing the cleaning of protective clothing in-house also saves both time and money compared to outsourcing via an external company. And, with hygiene being more important now than ever, greater control over the process means you can ensure protective items are being washed

thoroughly and to a high standard, so you can be confident that you're providing your employees with the best start to their working day.

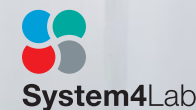

They also come with a host of innovative features to make laundry care as simple as possible:

- ✓ **Easy to use modern touch display**
- ✓ **Patented honey-comb drum for gentle but thorough cleaning**
- ✓ **Convenient to use by various groups thanks to intuitive language selection in 32 languages**
- ✓ **Large selection of channel-specific washing and drying programmes**
- ✓ **Performance Plus series offers convenient smart-phone technology for regular status updates**

Everything in one place

- ✓ Powerful appliances
- ✓ Perfectly integrated chemical agents
- ✓ Nationwide customer service
- ✓ Comprehensive service by our network of experts

1m²

Space

Compact footprint, less than 1m²

Longevity and reliability

Designed for 30,000 programme cycles

Short cycle times

Wash and dry in 87 minutes

Low consumption values and running costs

thanks to efficient design and build quality

Thorough cleaning

to help support infection control

Gentle washing and drying

thanks to patented honey-comb drum

360° service

After-sales service, pre-sales advice, installation, commissioning, maintenance, repairs, spare parts

Commissioning

Once products are installed, our Miele factory-trained engineers will commission your machine free of charge and instruct users on its proper use.

Maintenance

Maintenance involves the replacement of parts subject to wear and tear as part of preventative maintenance. In addition to this, regular checks and maintenance safeguard the value of investments.

Repairs

Alongside regular maintenance, a full-service maintenance contract from Miele Professional also covers the costs of further potential repairs.

Performance Verification

Performance verification includes the validation of processes to ensure cleaning, disinfection and sterilisation performance.
